Tanvi Ananya Kappala

Student

Bhubaneswar, Odisha, India

Summary

I am a student at KIIT University with a major in Computer Science. I have a passion for computer programming and information technology. This passion has given me the ability to develop programs for a multitude of things, including web designs, programming languages, and databases. My other love is information technology. I have many plans to implement newer technologies in my life such as cloud computing and managed IT services.

I am open to learning new things and getting involved with new projects that can help me learn or apply all that I have learned throughout my university career.

I enjoy solving technical problems, researching and developing new technologies, and designing software applications for different platforms. I am pursuing a degree program in Computer Engineering. I enjoy meeting people and working with them in a team environment. I also enjoy interacting with clients and customers. My strong customer service skills allow me to do this well. I am a quick learner with a fun, outgoing personality. In addition, I excel in my ability to work under pressure and handle stressful situations very well.

These skills that I have will be a benefit for any tech company.
